
PORTABLE POTTY TREATMENT

Active Ingredients

Naturally occurring microbes with high levels of enzymatic activity blended with various proprietary odour controls.

Description

The Portable Potty Treatment is a natural solution for portable toilet waste and odour control. proprietary microbes work continuously to reduce the accumulation of solid waste and odours. Enzymes such as, amylases, proteases, lipases and cellulases, biodegrade most of the solids found in the potties and liquefy the remaining solids for easy pumping. This product is much safer and more effective than formaldehyde and other harsh chemicals.

Advantages

- Natural microbes with long shelf life
- Controls unpleasant odours
- Reduces frequent pumping out
- Safe to humans and animals
- Biodegradable and environmentally friendly

Suggested Application

For the average size porto-potty:

Add 100ml of Portable Potty Treatment and 200ml of water before first using the potty. Re-apply after the potty is emptied.

Storage And Disposal

- Shelf life: 2 years.
- Store in original container.
